

1. For the questions below write down the file paths.
 - a. Use the steps above to write a file path from photo.png to contact.html
../lab02/bio.html
 - b. Use the steps above to write a file path from contact.html to logo.gif
../lab01/images2/logo.gif
 - c. Imagine there was an index.html file in the ist263 folder. Write the relative path from the bio.html file to the index.html file.
../index.html
2. <https://rcgoodri-su.github.io/ist263/lab03/contact.html>
3. <https://html5.validator.nu/?doc=https%3A%2F%2Frcgoodri-su.github.io%2Fist263%2Flab03%2Fcontact.html>
4.
 - a. I didn't have any questions about the lab.
 - b. The hardest part I would say was making the LinkedIn image clickable so that it goes to LinkedIn when clicked. I resolved this by combining the two ideas of adding an image to a page and adding a clickable link to the page.
 - c. 2
